ABOUT ME

Final-year BSc (Hons) Software Engineering undergraduate seeking a Business Analyst internship. Bridges business and technology through hands-on experience in requirements gathering, process mapping, and data-driven reporting. Skilled in SQL, data analysis, and building analytics dashboards that turn raw operational data into clear insights for decisionmaking. A strong communicator and collaborative team player, eager to translate stakeholder needs into well-documented, actionable requirements.

SKILLS

Business Analysis

Requirements Gathering & Analysis | Stakeholder Analysis | Business Requirements | Acceptance Criteria | SQL | Process Mapping | GAP Analysis | User stories

Process & Solution Analysis

Root-cause analysis | Workflow Analysis | Use Cases | Business Process Modelling | Critical Thinking | Activity Diagrams

Agile & Collaboration

Agile-Scrum | Stakeholder communications | Agile development | Team Collaboration | Writing and documentation | Rest API (RESTful API)

Technical Understanding

Software Development Lifecycle | Database Fundamentals | SQL Fundamentals | UI/ UX | Software Engineering.

EDUCATION & TRAINING

10/03/2023 - 07/12/2026 - PLYMOUTH, UNITED KINGDOM

BSC (HONS) IN SOFTWARE ENGINEERING- UNIVERSITY OF PLYMOUTH

Field(s) of study:Software and applications development and analysis

10/04/2022 - 18/01/2023 - COLOMBO, SRI LANKA

DIPLOMA IN ENGLISH LANGUAGE AND LITERATURE- AQUINAS COLLEGE OF HIGHER EDUCATION

PROJECTS

MindPrint - Mental Health Journaling App

Identified a gap in passive journaling tools for proactively surfacing declining mood patterns, and scoped a solo capstone to address it. Specified and built a real-time NLP pipeline that detects emotion, sentiment, and cognitive distortions from each journal entry, text or voice.

Modelled mood-trend tracking and decline-flagging logic, then matched a coping-toolkit -breathing, CBT, meditation - to what each entry surfaced.

Tools: Flutter, Dart, Riverpod, Firebase, HuggingFace API, AssemblyAI

Link <https://gihansa.me/mind-print-case-study.html>

FindFam - Family Safety Platform

Identified a gap in fragmented family-safety tools and defined a privacy-first platform for consent-based live location sharing, trusted circles, chat, and SOS alerts.

Documented functional and non-functional requirements, user stories, acceptance criteria, current-state vs target journeys, SOS workflows, stakeholders, and key data entities.

Defined privacy, security, and real-time notification rules to balance user safety with consent and transparency.

Mapped key stakeholders, data entities, and success metrics to connect business needs with measurable product outcomes.

Tools: Flutter, Fastify, TypeScript, Next.js, PostgreSQL/PostGIS, Redis, WebSockets, Docker

Link <https://gihansa.me/findfam-case-study.html>

Astrolift - Gym Management Platform

Mapped core business processes - memberships, workouts, payments, and attendance - into functional requirements. Defined role-based access for admins, trainers, and members to match real operational workflows. Authored user stories and acceptance criteria for a full-stack web application.

Tools: Next.js, Node.js, Express, TypeScript, Docker

Link <https://gihansa.me/astrolift-case-study.html>

Movie Ticket Booking System

Modelled the end-to-end booking workflow: browsing movies, selecting showtimes, seat reservation, and booking processing. Documented business rules and edge cases for seat availability and booking confirmation.

Tools: Java, JavaScript, CSS

Link <https://gihansa.me/movie-ticket-booking-case-study.html>

Hotel Booking System-Case Study

A regional hotel relies on phone and walk-in bookings, causing double-bookings and lost revenue. This case study frames the business problem, maps the as-is and to-be processes, and documents the requirements needed to launch an online booking platform.

Link <https://gihansa.me/hotel-booking-case-study.html>

Online Shopping Platform

A retailer taking orders manually through social-media DMs is losing track of stock and orders as demand grows. This case study frames the business problem, maps the as-is and to-be ordering processes, and documents the requirements for a proper online shopping platform.
